

Heavy Construction Equipment Operator Training

Course Details

Excavator operator – Level 4 Certification Course is based upon practical operations of Excavators & Excavator Loaders. The curriculum includes theory on equipment, practical and hands on training and shall be delivered by well trained and experienced professionals in the field of training from Tata Hitachi, the leading company in Construction Equipment in India. A state-of-the-art training facility is available with all equipment, its cut-sections, and different land terrain conditions for practical training.

Learning Outcome

A trained Excavator Operator will be able to drive and control an excavating machine which is a self-propelled machine used to dig and dump above the base level of the machine. Trainees will be able to understand the dynamics & basic mechanism of earthmoving operations and efficiently operate the equipment in all challenging conditions.

Details of the Programme
